To Whom It May Concern,

The KIPP Schools of New York are pleased to recommend the IT automation products from Kaseya, which we've been using to great success in our growing network of 4 schools, and plan to continue using for the foreseeable future.

Kaseya provides our small IT team the ability to manage virtually every aspect of our technology infrastructure, including:

- Helpdesk ticketing
- Remote support for end users
- Patch management and routine maintenance for workstations and servers
- Data backups and disaster recovery
- Powerful scripting tools
- Endpoint security
- Asset inventory and management reporting
- Network monitoring and alerts

Kaseya provides this powerful package of IT automation tools at a very attractive cost to schools, which we feel is recovered many times over through the time we save.

KIPP NYC fully endorses Kaseya and recommend it's use to any IT team looking for an IT automation solution

Sincerely,

Benjamin Beinfeld
